Solving Literal Equations — Set B — Answer Key

Type 1 One Step: Add or Subtract

1. Subtract 7 from both sides.

Answer: $x = y - 7$

2. Subtract p from both sides.

Answer: $q = r - p$

3. Add 6 to both sides.

Answer: $w = z + 6$

4. Add c to both sides.

Answer: $a = b + c$

5. Subtract t from both sides.

Answer: $s = 20 - t$

6. Add m to both sides.

Answer: $n = k + m$

Type 2 One Step: Multiply or Divide

7. Divide both sides by h.

Answer: $b = \dfrac{A}{h}$

8. Divide both sides by t.

Answer: $r = \dfrac{d}{t}$

9. Divide both sides by 4.

Answer: $s = \dfrac{P}{4}$

10. Divide both sides by d.

Answer: $F = \dfrac{W}{d}$

11. Multiply both sides by 5.

Answer: $x = 5y$

12. Multiply both sides by n.

Answer: $m = np$

Type 3 Two Steps

13. Subtract mx from both sides.

Answer: $b = y - mx$

14. Subtract $2l$, then divide by 2.

Answer: $w = \dfrac{P - 2l}{2}$

15. Subtract $3x$, then divide by 2.

Answer: $y = \dfrac{12 - 3x}{2}$

16. Subtract 7, then divide by 2.

Answer: $x = \dfrac{y - 7}{2}$

17. Add b, then divide by a.

Answer: $x = \dfrac{c + b}{a}$

18. Subtract $4x$, then multiply both sides by -1.

Answer: $y = 4x - 9$

Type 4 Parentheses

19. Divide by 2, then subtract a.

Answer: $x = \frac{b}{2} - a$

20. Divide by 5, then add n.

Answer: $m = \frac{p}{5} + n$

21. Divide by c, then add d.

Answer: $x = \frac{e}{c} + d$

22. Divide by 3, then subtract a.

Answer: $b = \frac{k}{3} - a$

23. Divide by 2, then subtract w.

Answer: $l = \frac{P}{2} - w$

24. Divide by a, then subtract 2.

Answer: $y = \frac{b}{a} - 2$

Type 5 Fractions and Formulas

25. Multiply by 2, then divide by b.

Answer: $h = \frac{2A}{b}$

© 2026 FangMath. All rights reserved.

26. Multiply by 2, then subtract a.

Answer: $b = 2M - a$

27. Multiply by 3, then divide by B.

Answer: $h = \dfrac{3V}{B}$

28. Multiply by 3, then subtract 4.

Answer: $x = 3y - 4$

29. Divide both sides by $2\pi r$.

Answer: $h = \dfrac{S}{2\pi r}$

30. Subtract 32, then multiply by $\frac{5}{9}$.

Answer: $C = \frac{5}{9}(F - 32)$
