Pairs of Lines & Angles — Notes

Watch the video and fill in each blank. Pause when you see “Your turn.”

Name: _____ Date: _____

☞ *Video: Three ways two lines can relate*

Key Idea

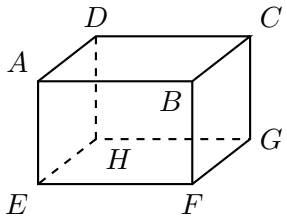

_____ the lines meet in one point

_____ coplanar and **never** meet

_____ _____ and never meet — only in 3D

☞ *Video: Look at a box*

Watch Me — Worked Example

$\overleftrightarrow{AB}$ and $\overleftrightarrow{DC}$ _____

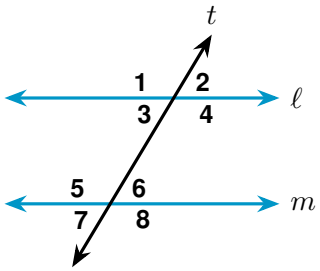

$\overleftrightarrow{AB}$ and $\overleftrightarrow{BF}$ _____

$\overleftrightarrow{AB}$ and $\overleftrightarrow{CG}$ _____

plane $ABCD$ and plane $EFGH$ _____

☞ *Video: A transversal makes 8 angles*

Key Idea

A _____ crosses two lines and makes _____ angles.

_____: between the two lines (angles $3, 4, 5, 6$)

_____: outside the two lines (angles $1, 2, 7, 8$)

☞ *Video: Name the angle pairs*

Key Idea

_____	same position	$\angle 1$ and $\angle$____
_____	inside, opposite sides	$\angle 4$ and $\angle$____
_____	outside, opposite sides	$\angle 1$ and $\angle$____
_____	inside, same side	$\angle 3$ and $\angle$____

☞ *Video: Watch out*

Common Mistake

Two lines that never meet are not always parallel. If no plane contains both, they are _____.

☞ *Video: Your turn*

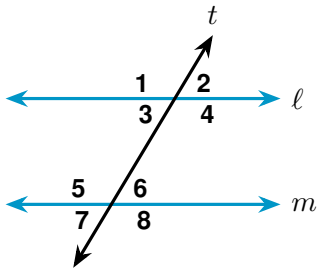

Your Turn

Name each pair.

(a) $\angle 2$ and $\angle 6$: _____

(b) $\angle 3$ and $\angle 6$: _____

(c) $\angle 4$ and $\angle 6$: _____

Notice

Remember: Lines can be **intersecting**, **parallel** or **skew**. A transversal makes 8 angles. Pairs: corresponding, alternate interior, alternate exterior, same-side interior.
