Algebraic Reasoning & Properties — Notes

Watch the video and fill in each blank. Pause when you see "Your turn."

Name: _____ Date: _____

☞ *Video: Every step needs a reason*

Key Idea

In geometry we don't just get the answer — we _____ every step with a _____: a definition, a property, a postulate or a theorem.

☞ *Video: Solve and justify*

Watch Me — Worked Example

$x - 4 = 10$ Given

$x = 14$ _____

The reason names _____ to both sides.

☞ *Video: Properties of equality*

Key Idea

Addition / Subtraction	add or subtract the _____ number on both sides
Multiplication / Division	multiply or divide both sides by the same number (not ____)
Substitution	if $a = b$, you can _____ a with b
Distributive	$a(b + c) =$ _____

☞ *Video: Reflexive, symmetric, transitive*

Key Idea

_____ $a = a$ e.g. $AB = AB$

_____ if $a = b$, then _____

_____ if $a = b$ and $b = c$, then _____

☞ *Video: A longer example*

Watch Me — Worked Example

$3(x+2)=21$	Given
$3x+6=21$	_____
$3x=15$	_____
$x=5$	_____

☞ *Video: Your turn*

Your Turn

Name the property.

(a) If $AB=CD$, then $CD=AB$. _____ — the equation is flipped.

(b) If $m\angle 1=m\angle 2$ and $m\angle 2=m\angle 3$, then $m\angle 1=m\angle 3$. _____ — a chain.

Notice

Remember: Every step needs a **reason**. Did something to both sides? Name that property of equality. **Reflexive** $a=a$, **symmetric** flip, **transitive** chain.
