Undefined & Defined Terms — Practice

A worked example comes before each type. Show your thinking.

Name: _____ Date: _____

Type 1 Name the Figure

Watch Me — Worked Example

Two endpoints, no arrows ⇒ a **segment**.
Answer: $\overline{MN}$ (or $\overline{NM}$)

1. Name the figure.

_____

2. Name the figure.

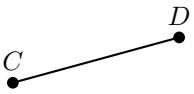

_____

3. Name the figure.

_____

4. Name the figure.

_____

Type 2 Same or Different?

Watch Me — Worked Example

Are $\overleftrightarrow{AB}$ and $\overleftrightarrow{BA}$ the same?
A line goes on forever both ways, so the order of the letters does not matter. **Answer: same.**

5. Are $\overline{EF}$ and $\overline{FE}$ the same?

_____

6. Are $\overrightarrow{EF}$ and $\overrightarrow{FE}$ the same?

_____

7. Are $\overrightarrow{GH}$ and $\overrightarrow{HG}$ the same?

_____

8. Are $\overleftrightarrow{GH}$ and $\overleftrightarrow{HG}$ the same?

_____

Type 3 Segment or Length?

Watch Me — Worked Example

Which one is a **number**: $\overline{PQ}$ or PQ?
The bar means the figure itself. No bar means its length. **Answer:** $\boldsymbol{PQ}$ (for example $PQ = 7$).

9. $\overline{AB}$ is 4 cm long. Fill in: $\square = 4$.

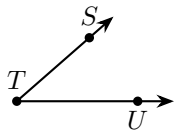

10. Is "$\overline{AB} = 4$" written correctly? Why?

11. Write "the length of segment CD is 9."

12. Which is a figure you can draw: $\overline{MN}$ or MN?

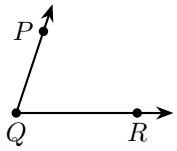

Type 4 Name the Angle

Watch Me — Worked Example

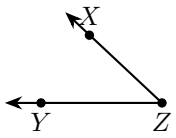

The vertex is T, so T goes in the middle.
Answer: $\angle \boldsymbol{STU}$ or $\angle \boldsymbol{UTS}$ (or just $\angle T$).

13. Name the angle two ways.

14. Name the angle two ways.

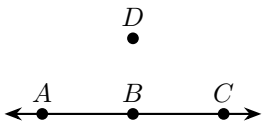

15. In $\angle DEF$, which point is the vertex?

16. Is $\angle ABC$ the same angle as $\angle BAC$? Why?

Type 5 Collinear, Coplanar, Intersection

Watch Me — Worked Example

Are A, B, C collinear? They lie on one line: **yes**.
Are A, B, D collinear? D is off the line: **no**.

17. In the example picture, are B, C, D collinear?

18. Two different lines cross. They intersect in a . . .

19. Two walls of a room meet. Two planes intersect in a . . .

20. Are any 3 points always coplanar?
