Perimeter & Area in the Coordinate Plane — Notes

Watch the video and fill in each blank. Pause when you see “Your turn.”

Name: _____ Date: _____

☞ *Video: Side lengths from coordinates*

Key Idea

Rectangle $ABCD$:

$AB = 5 - 1 =$ _____ $BC = 4 - 1 =$ _____

Same y: subtract the _____’s. Same x: subtract the _____’s.

☞ *Video: Perimeter and area*

Key Idea

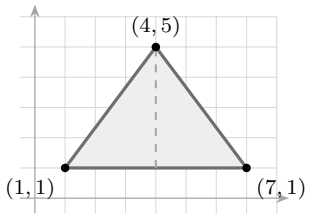

Perimeter = _____: $P = 4 + 3 + 4 + 3 =$ _____

Area = _____: $A = 4 \cdot 3 =$ _____

Perimeter is a length: _____. Area counts squares: _____.

☞ *Video: Area of a triangle*

Key Idea

base $= 7 - 1 =$ _____

height $= 5 - 1 =$ _____ (straight _____ from the base)

$A =$ _____ $\cdot b \cdot h = \frac{1}{2} \cdot 6 \cdot 4 =$ _____

☞ *Video: A slanted side? Use Pythagoras*

Key Idea

Same triangle. A slanted side goes across 3 and up 4: $\sqrt{3^2 + 4^2} = \sqrt{25} =$ _____.

The other slanted side is also 5. $P = 6 + 5 + 5 =$ _____

☞ *Video: Watch out*

Common Mistake

For a _____ side you can't just count squares. Use the _____ — or draw the right triangle and use _____.

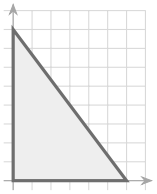

☞ *Video: Your turn*

Your Turn

Triangle $P(0,0)$, $Q(6,0)$, $R(0,8)$. Find its perimeter and area.

$PQ = 6,\ PR = 8, \quad QR = \sqrt{6^2 + 8^2} =$ _____

Perimeter $= 6 + 8 + 10 =$ _____ Area $= \frac{1}{2} \cdot 6 \cdot 8 =$ _____

Notice

Remember: Same y: subtract the x's; same x: subtract the y's. Perimeter: add the sides. Area: rectangle $b \cdot h$, triangle $\frac{1}{2}bh$. Slanted side: Pythagoras or the Distance Formula.
