# Angles — Practice

A worked example comes before each type. Show your thinking.

Name: _____ Date: _____

## Type 1 Classify the Angle

**Watch Me — Worked Example**

Classify an angle of $132°$.
It is more than $90°$ but less than $180°$. **Answer: obtuse**

**1.** $47°$

**2.** $90°$

**3.** $179°$

**4.** $180°$

## Type 2 Angle Addition Postulate

**Watch Me — Worked Example**

$D$ is inside $\angle ABC$. $m\angle ABD = 28°$ and $m\angle DBC = 47°$. Find $m\angle ABC$.
Part + part = whole: $28 + 47 = 75$. **Answer: $75°$**

**5.** $m\angle ABD = 40°$, $m\angle DBC = 65°$. Find $m\angle ABC$.

**6.** $m\angle ABC = 120°$, $m\angle ABD = 45°$. Find $m\angle DBC$.

© 2026 FangMath. All rights reserved.

**7.** $m\angle ABD = x + 10$, $m\angle DBC = 2x + 5$, $m\angle ABC = 90°$. Find $x$ and $m\angle DBC$.

**8.** HARD $\overrightarrow{BD}$ bisects $\angle ABC$. $m\angle ABD = 3x + 4$, $m\angle DBC = 5x - 12$. Find $m\angle ABC$.

## Type 3 Complements & Supplements

**Watch Me — Worked Example**

Find the complement and the supplement of $38°$.
Complement: $90 - 38 = 52°$. Supplement: $180 - 38 = 142°$. **Answer: $52°$, $142°$**

**9.** Find the complement of $71°$.

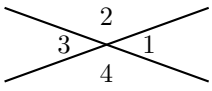

**10.** Find the supplement of $98°$.

**11.** Two angles are complementary. One is twice the other. Find both.

**12.** Two angles are supplementary: $x$ and $3x - 20$. Find both.

## Type 4 Vertical Angles & Linear Pairs

**Watch Me — Worked Example**

$m\angle 1 = 65°$. Find $m\angle 3$ and $m\angle 2$.
Vertical angles are equal: $m\angle 3 = 65°$. Linear pair: $m\angle 2 = 180 - 65 = 115°$.
**Answer: $65°$, $115°$**

Use the picture in the example for problems 13 and 14.

**13.** $m\angle 2 = 128°$. Find $m\angle 4$.

**14.** $m\angle 1 = 73°$. Find $m\angle 2$.

**15.** Vertical angles measure $5x - 10$ and $3x + 30$. Find $x$ and the angle.

**16.** A linear pair measures $2x + 15$ and $3x - 5$. Find both angles.
